

LORENZ TAZAN

IT Support Professional | Workstations, Systems & Networks

lorenztazan@gmail.com | 240-256-2410 | github.com/AIKUSAN | lorenztazan.com

PROFESSIONAL SUMMARY

Hands-on IT support professional with **10+ years of experience** troubleshooting computers, software, account access, network connectivity, and Linux-hosted services for clients and technical teams. Provides remote and on-site workstation setup, hardware repair, user support, incident follow-through, and technical documentation. Known for practical problem-solving, clear communication, and dependable support across user, systems, and network environments.

CORE SKILLS

- **End-User Support:** Remote and desk-side troubleshooting, software installation, workstation setup, printers, peripherals, onboarding assistance, user guidance, and issue escalation
- **Operating Systems & Applications:** Windows 10/11, macOS, Debian/Ubuntu Linux, Microsoft 365 familiarity, and SharePoint setup assistance for clients
- **Hardware & Deployment:** Desktop and laptop diagnostics, motherboard repair and replacement, component troubleshooting and replacement, memory upgrades, data recovery, and workstation/server builds
- **Networking & Access:** TCP/IP, Wi-Fi, VPN, VLANs, MikroTik, pfSense, Ubiquiti, connectivity troubleshooting, and account-access and permissions support
- **Platform Support & Documentation:** Linux services, Java-based applications, MySQL/MariaDB, Git, Docker, compatibility testing, technical guides, issue documentation, and cross-team resolution

PROFESSIONAL EXPERIENCE

Independent IT & Platform Support Contractor

Land of Promise (Patrick Bezalel Pte Ltd) | June 2024–Present | Remote

- Support a Linux-based online platform and dedicated servers by investigating service, performance, connectivity, and compatibility issues.
- Support platform account access and permissions, assist with onboarding, and troubleshoot access and software issues for users and team members.
- Maintain Java-based server plugins, test updates, document fixes, and coordinate releases and incident follow-through with the project team.

Network Infrastructure Consultant (Contract)

Proven Training Concepts | March 2025

- Deployed network equipment and wireless access points to provide access to email, shared drives, printers, and other network resources at a contractor facility.
- Configured workstations, installed software, assisted with user-account setup, and provided desk-side troubleshooting during deployment.
- Wrote user guides for connecting to network resources and resolving common connectivity issues.

Lead Developer / Platform Support

DigiHwy — Land of Promise Project | 2023–June 2024 | Hybrid

- Supported the Land of Promise partner project as a full-time DigiHwy employee, working with the DigiHwy team and project owner Patrick Bezalel Pte Ltd.
- Developed and maintained Java-based server features and plugins; investigated application and server issues and tested releases for compatibility.
- Documented fixes and coordinated technical work across office and remote settings to support daily platform operations.

PROFESSIONAL EXPERIENCE — CONTINUED

IT Support & Hardware Repair Specialist — Independent Business

Teknomahika | 2015–2023

- Supported clients through day-to-day computer repair and technical support, including **20+ IT service projects performed at client-owned business sites across multiple locations**.
- Diagnosed and repaired PC and Mac desktop and laptop systems, including motherboard repair and replacement, memory upgrades, component troubleshooting, peripheral issues, and data recovery.
- Helped clients set up SharePoint during the pandemic.
- Procured, installed, configured, and tested components for custom workstation and server builds.
- Maintained **95%+ customer satisfaction** and an **80% repeat-business rate** across major engagements through responsive service, clear explanations, and practical user training.

Network Administrator / IT Specialist (Contract)

Panay Telephone Corporation II | 2021–2022

- Monitored connectivity and supported network infrastructure serving 700+ concurrent subscribers.
- Configured and maintained MikroTik and pfSense network equipment and controls, investigating connectivity and performance issues.
- Applied permissions, firewall rules, and access controls in accordance with company security policies.

CRM Analyst / Specialist

iQor | 2020–2021

- Managed and analyzed customer data and prepared reports and dashboards for service delivery and operational decisions.
- Trained employees on CRM processes, system use, and established workflows.
- Worked with sales and support teams to improve data quality, usability, and day-to-day CRM operations.
